

Willi Miesch
Swiss (born 1964)
Member of the Board

After completing his apprenticeship as a precision engineer at the Institut Straumann AG, Willi Miesch extended his qualifications by finishing his degree as an operations technician TS at the ABB Engineering School Baden. Additionally he completed his postgraduate studies in market-oriented Business Management at the University of Central Switzerland. His employment in various production departments of the Institut Straumann AG in Switzerland and America was followed by several years in the production department of Stratec Medical in Ticino. In between, as a member of the Board of Management of a bicycle manufacturer, he was responsible for the entire technical part for several years. Since the year 1998 Willi Miesch is CEO of Medartis managing the complete operative business. He is member of the Board of Medartis as well as member of the Board of the International Bone Research Association (IBRA) and Chairman of the Board of Tschudin & Heid AG, Waldenburg.
