PRECISION IN FIXATION

CMX

Creating More Experience.

**CMX** is an integrated service that supports your workflow prior to and during the surgery together with the most suitable plates and operating tools.

**CMX** accompanies the cases from initiation to intervention: everything is accessible directly from your browser anytime and anywhere.

## Benefits of the CMX Portal

### Intuitive navigation and overview of the process

Any case-related information is accessible directly from the portal.

### User-friendly communicative tools

Option to contact a designer in the chatbox while leaving comments directly on the 3D-model<sup>1</sup>.

### No additional software installations required

The web-based platform is accessible from your browser anytime and anywhere.

### Secure data transfer

The portal is secured by HTTPS and thus guarantees secure and encrypted data transmission.

<sup>1</sup> In complex cases, a web meeting may be helpful. You can request a web meeting at any time.

## First Service: CMX MODUS 2 Mandible

**CMX MODUS 2 Mandible** offers custom-made devices such as plates, surgical guides and 3D bone models as part of the CMX service.

CMX custom-made devices are compatible with the multidirectional and angular stable TriLock locking screws featuring the patented HexaDrive screw head design.
