

**Willi Miesch**

**Swiss (born 1964)**

**Member of the Board of Directors since 2010**

**Chairman of the Strategy and Innovation Committee since 2019**

Willi Miesch joined Medartis in 1998, where he successfully headed the operational business as CEO until August 2019 and developed Medartis from a start-up to a listed company of its current size with a broad international presence. He has been a member of the Board of Directors since 2010 and assumed further responsibilities as Chairman of the Strategy and Innovation Committee of the Board of Directors as of 2019. He is also a Board Member of the International Bone Research Association (IBRA). As a member of the Investment Advisory Committee of MTIP he contributes his sound expertise and extensive experience in the field of Medical Technology and plays a key role in the assessment and selection of MedTech start-ups.

Prior to joining Medartis, he held long-term managerial positions in various production departments of the Institut Straumann AG Switzerland and USA and was Head of Manufacturing at Stratec Medical in Mezzovico, Ticino, Switzerland. In these roles he was responsible for the overall manufacturing processes as well as for the manufacturing implementation of the spine product line. Moreover, he was a member of the Executive Management Board at Villiger, a bicycle manufacturer, being responsible for the entire technical part for several years.

Willi Miesch started with an apprenticeship as precision engineer at Institut Straumann AG and extended his qualifications through a degree as operations technician TS at ABB Engineering School Baden and postgraduate studies in market-oriented Business Management at the University of Central Switzerland.

Willi Miesch enriches the Board of Directors with his proven expertise in the field of medical technology, his global network of experts in the industry, his comprehensive experience related to his background in precision engineering and his long-term leadership.
